ROYAL VISIT .- His Mujesty the King visited the United States war steamer Mohongo on Thursday forenoon, and was received with royal honors. It had been arranged to have the usual naval practice during his visit on board, and his Majesty was entertained with and witnessed all the customary maneuvers with guns, arms, &c. THE ENGLISH NEWS .- The telegraphic news received by the Montana was crowded out last week, THE ASSETS AND LIABILITIES ARE ESTIMATED FOR THE 1ST but will be found on this page to-day. The European news is especially interesting, giving as it does an outline of the debate on the great struggle to abolish the Appointments of the Established Church in Ireland. The bill was defeated by a majority of five, whereupon the jubilant Tory Lords indulged in the somewhat unusual demonstration of harraing over their victory. The liberals, under Gladstone and Bright, have fought nobly and been defeated. Their victory is only a question of time, and by the next time the measure is brought before the country the tories will have learned that "discretion is the better part of valor." We believe that two-thirds of the British | Honolulu people are to-day in favor of the measure, which will, to some extent, relieve Ireland and the Irish from bardensome oppression.

FIRE.-The building in the rear of Liberty Hall known as the Mormon Church, took fire on Sanday afternoon last. The upper floor was occupied by some natives, and it is supposed that the fire originated from carelessness in smoking. The roof was of thatch, which was all torn off, and the fire in this proved February 19th, 1862—and which was framed with regard to Chipa, is hereby made applicable to Japan.

[L. S.]

"The Act of Congress to product the coole trade, the proved February 19th, 1862—and which was framed with regard to Chipa, is hereby made applicable to Japan.

[L. S.] thinks that the fire was arrested mainly by the aid of the buckets with which every house is by law provided. Some twenty or thirty of these were on hand at the first alarm, and though water was very scarce, they doubtless served the purpose intended. A large quantity of Mormon Bibles, in sheets, were stored in the building, and became pretty thoroughly saturated.

- In this connection we may add, that some time since, the Superintendent of Water Works issued a notice that on the 20th of June there would be a general inspection of faucets throughout the city. We are not aware that anything of the kind has been Public Laws .- On the first page will be found done, and are quite sure that a score at least of de- several of the laws passed at the late session of the fective faucets can be found to-day, from which Legislature. by the Government officers.

AR ECLIPSE.—The total clipse of the sun which is to take place on the 18th of August next will present such a long duration of darkness, that astronomers are anticipating it with unusual interest. From near Aden, in Arabia, the central line of the eclipse extends to the southern coast of New Guinca, crossing Hindoostan, the Bay of Bengal, the Malayan peninsula and the Gulf of Siam on the way ; and at certain places on this line the duration of total darkness will be 6 degrees 46 minutes. English and French astronomers are making preparations for observations in the track of the eclipse. It will not be

FROM KONA .- We are glad to learn that they are having an abundance of rain in Kona, Hawaii. For eight months a drought has prevailed, and in consequence there is a scarcity of food, especially of the native staff of life, poi, of which large quantities are now sent up by every vessel leaving for that district. Owing to this drought, the orange crop will be almost nothing this year. Though most of the trees look thrifty, and blossomed abundantly, yet the fruit set very sparingly, and many of the young oranges have dropped off. The rains have now set in again abundantly, promising to change this state of things after

RELIGIOUS INTELLIGENCE .- On Sunday next, 26th inst., at 10 o'clock A. M., there will be celebrated at the Roman Catholic Cathedral one of the most solemn and imposing ceremonies of the pontifical of that church—the ordination of deacons to the priesthood -when the Rev. Deacon Boniface Schaefer will be ordained priest by his Lordship Bishop Maigret. Rev. Schaefer was ordained deacon here about one month ago. One of the most interesting features in the ordination to the priesthood is that the canon of the Mass, which is usually said in a low voice, is now read aloud by the ordaining Bishop, accompanied by the newly ordained priest. Rev. Boniface Schaefer wee hear is intended for the East Maui Mission .-

ND A GENERAL ASSORTMENT OF MINISTERIAL CHANGES.—During the absence of Minister Varigny in Europe, which it is hoped will be permanent, His Ex. Attorney General Phillips will act as Minister of Foreign Affairs, ad interim. And until the return of His Ex. C. C. Harris, now in Washington, His Ex. F. W. Hutchison will act as Minister of Finance, ad interim. By these changes it will be seen that the four cabinet offices are filled by two persons; and it is certain that one smart man could do the whole business which by law devolves on he will send in to the Senate with the copy of the four, with a saving of at least fifteen thousand dollars new treaty. a year to the public treasury.

Mr. R. A. Fish, of Worcester, Mass., has invented and patented a new fish book. The shank, instead of exding in an eye, doubles up almost its entire length, so that the new book looks like a bair-pin with a barbed hook on one shank. This continuation of the shank acts as a lever to turn the hook in the mouth of the fish and insure a catch.

CHINA .- "This mission means progress. It means that China desires to come into warmer and more Its abolition would beal the wounds of Iteland. she desires to come under the obligations of international law, to the end that she may enjoy the advantages of that law. It means that China, conscious of her own integrity, wishes to have her questions to the general judgment of mankind. It means that she intends to come in the brotherhood of nations. It means commerce; it means peace; whole human race. It means-as you have said here to-night-that it is one of the mightiest movements of modern times. And though this ephemeral mission may pass away, that great movement will go on. The great deed is done. The fraternal feeling of four bundred millions of people has commenced to flow through the land of Washington to the older nations of the West, and it will flow forever."-Minister Burlingame, in his address at

At Paris, June 30.—During the d the close of his speech he advocated the exercise of a conciliatory spirit toward all. "In the hour of disappointment," he said, "let not the passions inflamed by stinging disappointment, however keen our sense of wrong, carry us beyond the bounds of wisdom and self-respect. The things that we have to accomplish are so great that whatever the provocation may be we can certainly not afford to let personal excitement seduce us into compromising our dignity. Whoever may become our friend whoever may become our enemy, let us steadily march on with unflinching determination to fulfill all the duties that rest upon us, to secure justice to the soldier who fought our battles. justice to the Southern men who fought for the Union cause, justice to the colored race, to whom we have promised true and eternal freedom, and justice to the national creditor who has staked his credit. Let us faithfully strive to restore the honor of the Government, to crush corruption inside of the party as well as continued. For the first time in the history of science the feat has been practically accomplished of sending two telegraphic dispatches at the same time, from oppodirections over one wire, on long distances. The inventor of the instrument is a Boston man, and the invention is one of great importance, making a second wire unnecessary, and doubling the capacity of existing lines.

"Answer your letters," says Emerson in one of his discourses. "Keep your friendship in repair; meet good will half way." This is good advice, and much needed by the majority of men. Letter writing by most persons is felt to be an irksome task, yet how t enlarges the circle of our friendship, and consemently of our sources of rational enjoyment. True friendship is a great solace of life, but in this world of separations it is difficult to maintain interourse with friends without the aid of correspon ence. Friends go away, and are forgotten. what is more pleasant, in the dull monotony of life than to receive a letter from a long absent, halforgotten friend? The man who gets no letters is hut out from one of the great enjoyments of life How eagerly they are looked for by the absentthe traveler in a strange land, the adventurer seeking the fortune which is to make happy the dear ones at home! Gladstone had declared that Best Bar Iron and Cumberland Coal the Irish question must be met, even if it cost the Whigs their offices. The bill had passed in the House of Commons by an enormous majority. If a similar suspensory law was proper in Jamaica, it | Overshot, Breast, Turbine, Centre Discharge was still more proper in Ireland, where the Anglicans number four hundred and fifty thousand and the Chatholics number from four to five millions, and there is but one diocese in which the Anglicans exceed in numbers one-fourth of the population. Thus the Irish church was a failure as a missionary establishment. To call its disestablish-ment sacrilege was absurd, as its revenues had belonged successively to several different sects. Palmerston said Englishmen will never concede until concession becomes surrender. Why should not this bill be passed? It was useful, practical, and its passage would prove that Parliament is ready to treat the Irish question justly. Lord Gray moved that the second reading of the
